area will be related to and integrated with the characteristics and management objectives for adjacent public and private land areas. General recommendations for future acquisition will be included as appropriate.

An initial draft of the unit management plan for each state land area including alternative management objectives, where appropriate, will be submitted to the Agency for review and comment, prior to the preparation of the final draft plan for public review.

Opportunity will be made for review and comment on the draft unit management plans by the public and other interested parties, and a public meeting or meetings will be convened as appropriate for that purpose.

Final unit management plans will be prepared by the Department of Environmental Conservation after due consideration of all comments and recommendations made on the public review draft. The Commissioner of the Department of Environmental Conservation will adopt each final unit management plan which will then be filed with the Agency. The Department of Environmental Conservation will report annually to the Agency on progress made toward the implementation of each adopted unit management plan.

Any material modification in adopted unit management plans will be made following the procedure for original unit plan preparation.

The Department of Environmental Conservation in the past three years has made significant progress in getting the unit management planning process underway. This progress should be continued so that all unit management plans will be completed before the next five-year review of the

master plan in 1989/90. The Department of Environmental Conservation should commit the necessary resources for that purpose.

SPECIAL HISTORIC AREA UNIT MANAGEMENT PLANS

This master plan also provides for special historic area unit management plans for the development and management of state historic sites. This special procedure is designed to address the unique problems associated with these types of facilities. Such special historic area unit management plans will be the subject of public hearings and will be submitted to the agency for its approval as being consistent with the master plan prior to their implementation.

INTERPRETATION AND APPLICATION OF THE MASTER PLAN

More than a dozen years of experience under the master plan has confirmed that questions of interpretation of the master plan as applied to a given activity or land use arise from time to time. This is particularly the case in the context of those guidelines that are quite general in character. During the public hearings and consultations preceding the 1978/79 revision of the master plan, there was considerable public comment on the need to clarify the relationship of the Agency to the Department of Environmental Conservation and other state agencies on matters of interpretation and application of the guidelines of the master plan.

In this regard, it is well to remember that the legislature has established a two-tiered structure regarding state lands in the Adirondack Park. The Agency is responsible
