As you requested, I'm asking the Commission to acknowledge that the most recent proposal before the Commission is so substantially different from the previous submissions that it should be reviewed at a new, traditional public hearing -- one not constrained by a temporary review procedure. This can be accomplished by seeking an extension of time for review and consideration of public input. If the applicant will not grant such an extension, the Commission should disapprove the project as previously presented, because it is inconsistent with the provisions of the Pine Barrens Act and SEQRA. In any case, we ask that the convening of a decision on the earlier project be delayed until after July 5 in the hope that a more traditional public hearing may be completed in the usual manner. In fairness and equity to the public we ask for the Commission's consideration. Changing the rules for this applicant is simply unfair. Richard Amper.
