Connetquot River~ October 28

Mill River~ November 4

### Grades 2-12— A Fun, Experiential science research program!

**Using the Environment Integrated Context for Learning-** At each location, teams of students use seine nets and lab equipment to investigate aquatic life, biodiversity, water chemistry and quality, tides and weather and other parameters to fit into your STEM curriculum.

**Citizen Science-** Results for all locations and schools are posted on our "A Day in the Life" Website to be used by the students, land use decision makers, civic groups, and the general public.

**Creating Environmental Stewards-** Students are our future decision makers; our goal is to give them the inspiration and knowledge to make informed decisions for environmental health.
