
A Day in the Life

Grades 2-12—A fun, experiential science research program!

Using the Environment as an Integrated Context for Learning - At each location, teams of students use seine nets and lab equipment to investigate aquatic life, biodiversity, water chemistry and quality, tides, weather and other parameters.

Citizen Science- Results for all locations and schools will be made available to be used by students and teachers to incorporate into there curricula.

Creating Environmental Stewards- Students are our future decision makers; our goal is to give them the inspiration and knowledge to become dedicated stewards of the environment.
