RE: Determination of Jurisdiction
Kent Animal Shelter
2259 River Road, Calverton, NY

Dear Sir or Madam:

I am writing to request a determination of jurisdiction letter from the Central Pine Barrens Joint Planning & Policy Commission for proposed renovation and reconstruction of several of the improvements to the Kent Animal Shelter at 2259 River Road, Calverton. As detailed in the enclosed Project Description, proposed improvements to the shelter include renovation and/or in-place reconstruction of existing buildings, abandonment of existing cesspools and installation of new I/A OWTS and stormwater drainage, and establishment of a new native buffer adjacent to the Peconic River. No new structures are proposed, and all building renovation/reconstruction will occur in-place of the existing structures. Accordingly, the development footprint on-site will remain the same as existing conditions following completion of this project.

According to §13(iii) of NYS ECL Article 57, “work for the maintenance, renewal, replacement, reconstruction, improvement, or alteration of any existing structure or additions to an existing residence or residential property owner by an association formed for the common interest in real property” is not considered development. All proposed building improvements at the Kent Animal Shelter consist of maintenance, renewal, replacement, and/or reconstruction, and accordingly should be eligible for non-jurisdiction under Article 57. Additionally, proposed improvements will serve to eliminate existing effluent impacts to the Peconic River through installation of the new I/A OWTS.

In support of this jurisdictional determination request, the following materials have been enclosed:

- (5) Project Descriptions
- (5) Site/Sanitary Plans prepared by Condon Engineering, last dated 1/28/21

If you have any questions or require additional information to enable review and determination issuance, please contact me at (631) 727-2400 or CBowman@landuse.us. Thank you.

Sincerely,

Project Description

Existing Conditions:

The applicant proposes to renovate and/or reconstruct several of the existing buildings located at the Kent Animal Shelter at 2259 River Road, Calverton, NY, as well as install a new Innovative and Alternative Onsite Wastewater Treatment System (I/A OWTS), stormwater drainage, and native plantings. The 2.138-acre parcel is currently developed with numerous buildings including six (6) frame buildings (742 SF; 1,187 SF; 1,068 SF; 1,446 SF; 3,091 SF; and 1,045 SF), frame garage (206 SF), two (2) frame sheds (28 SF & 100 SF), sanitary system, asphalt driveway and parking, and various fences. An archaeological site is present throughout the middle of the parcel, and the Peconic River and associated wetlands border the site to the south. No work is proposed within the archaeological site, nor within the limits of the wetland.

Proposed Building Renovations:

The applicant proposes to renovate and/or reconstruct many of the existing buildings on site. No new buildings or impervious areas are proposed, and all work will be completed within the footprint of the existing structures. Specifically, the existing Cat Retirement Home (1,446 SF), Administration Building (1,068 SF), Adoptable Cats Building (742 SF), and Vet Clinic (1,187 SF) are to be renovated. No changes to the footprint of these buildings are proposed, and the size of renovated buildings will remain equivalent to the existing structures. Additionally, the existing Adoptable Dog Housing Building (3,091 SF) and Isolation Building (1,045 SF) are to be demolished, and new buildings constructed in-place of the existing structures. No changes to the footprint of these buildings are proposed, and the size of reconstructed buildings will remain equivalent to the existing structures.

Proposed I/A OWTS and Drainage:

The existing sanitary system will be upgraded to a new I/A OWTS. Accordingly, existing cesspools are to be pumped dry and abandoned or removed as per Suffolk County Dept of Health standards. A new I/A OWTS (E/One Extreme Series DH152 Ejector Unit) and associated leaching galleys and septic tanks will be installed to service the renovated and reconstructed buildings. The new I/A OWTS will be located as far landward as possible, and leaching galleys will exhibit a minimum 3' separation to groundwater. Additionally, new French drains and drywells are proposed to accommodate stormwater runoff associated with the buildings.

Native Plantings:

A new buffer area (12,720 SF) adjacent to the wetlands is also proposed. This buffer area will provide additional native habitat, help enhance the ecological value of the area, and further protect the Peconic River. The existing concrete walk & brick patio within the proposed buffer area are to be removed, and all existing trees and shrubs are to remain. The proposed buffer area will be re-vegetated as follows:

 2. ALL SEDIMENT CONTROL PRACTICES AND MEASURES SHALL BE CONSTRUCTED, APPLIED AND MAINTAINED IN ACCORDANCE WITH THE APPROVED EROSION AND SEDIMENT CONTROL PLAN.
 3. TOPSOIL REQUIRED FOR THE ESTABLISHMENT OF VEGETATION SHALL BE STOCKPILED IN AMOUNT NECESSARY TO COMPLETE FINISHED GRADING OF ALL EXPOSED AREAS. AREAS TO BE FILLED SHALL BE CLEARED, GRUBBED, AND STRIPPED OF TOPSOIL TO REMOVE TREES, VEGETATION, ROOTS OR OTHER OBJECTIONABLE MATERIAL.
 4. AREAS WHICH ARE TO BE TOP-SOILED SHALL BE SCARIFIED TO A MINIMUM DEPTH OF FOUR INCHES PRIOR TO PLACEMENT OF TOPSOIL.
 5. ALL FILLS SHALL BE COMPACTED AS REQUIRED TO REDUCE EROSION, SLIPPAGE, SETTLEMENT, SUBSIDENCE OR OTHER RELATED PROBLEMS. FILL INTENDED TO SUPPORT BUILDINGS, STRUCTURES AND CONDUITS, ETC. SHALL BE COMPACTED IN ACCORDANCE WITH LOCAL REQUIREMENTS OR CODES.
 7. ALL FILL SHALL BE PLACED AND COMPACTED IN LAYERS NOT TO EXCEED 9 INCHES IN THICKNESS.
 8. EXCEPT FOR APPROVED LANDFILLS, FILL MATERIAL SHALL BE FREE OF FROZEN PARTICLES, BRUSH, ROOTS, SOIL, OR OTHER FOREIGN OR OTHER OBJECTIONABLE MATERIALS THAT WOULD INTERFERE WITH OR PREVENT CONSTRUCTION OF SATISFACTORY FILLS.
